

JEN TRIED IT FRIDGE CARD

First Latte on the CM33

The exact steps I followed on my first try with the COWSAR CM33. Stick it on the fridge and check them off.

PART 1 Get the shot ready

1. **Click in the two-cup filter**
   It snaps into the portafilter. ☐
2. **Add your grounds and tamp**
   Scoop them in, then pack them down with the tamper. ☐
3. **Lock the handle in**
   Line it up with the open lock icon, twist it over to the closed lock, and push till it's tight. ☐

PART 2 Pull the shot

4. **Turn it on**
   Press the button on the side and wait for the beep. ☐
5. **Press the double shot button**
   The shot starts coming out right away. ☐

PART 3 Froth and pour

6. **Turn the knob to the steam icon**
   Hold your milk under the wand until it goes frothy. I used oat milk. ☐
7. **Pour the milk over the shot**
   That's your latte. Latte art can wait. ☐

My notes your milk, your mug, whatever you'd change next time

I was a mess on my first one too. Looking back, it was easy.
